

25 April 1985

NOTE TO: DCI
DDCI

This is FYI.

In response to your note, asking about the background of Secretary Weinberger's letter to you on nuclear testing, I understand your request. But I cannot get the work done and in your hands in time for tomorrow's breakfast with Secretary Weinberger. OSWR and ACIS are working this issue as fast as we can, but this issue is too big, too complicated, and too important to have it done today.

I would propose that you tell Secretary Weinberger tomorrow that you got his letter on nuclear testing, that you understand its contents and its significance, that you have asked for some background information and the response, and that you will discuss this issue with Secretary Weinberger before you send your response.

If I can do more to assist you here, please call and let me know.
